## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Silicon chloride	Liquid  Colorless to light yellow  Suffocating odor  Reacts violently with water. Irritating gas is produced on contact with water.
Evacuate. KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Not flammable. DO NOT USE WATER OR FOAM ON ADJACENT FIRES.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled will cause difficult breathing. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 1. CORRECTIVE RESPONSE ACTIONS

Dilute and disperse  
Stop discharge  
Chemical and Physical Treatment:  
Neutralize  
Do not add water to undissolved material  
Pump or dredge contaminated sediment

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Acid-canister-type gas mask or self-contained breathing apparatus; goggles or face shield; rubber gloves; other protective clothing to prevent contact with skin.
- 3.2 **Symptoms Following Exposure:** Inhalation causes severe irritation of upper respiratory tract resulting in coughing, choking, and a feeling of suffocation; continued inhalation may produce ulceration of the nose, throat, and larynx; if inhaled deeply, edema of the lungs may occur. Contact of liquid with eyes causes severe irritation and painful burns; may cause permanent visual impairment. Liquid may cause severe burns of skin. Repeated skin contact with dilute solutions or exposure to concentrated vapors may cause dermatitis. Ingestion causes severe internal injury with pain in the throat and stomach, intense thirst, difficulty in swallowing, nausea, vomiting, and diarrhea; in severe cases, collapse and unconsciousness may result.
- 3.3 **Treatment of Exposure:** Get medical attention at once following any exposure to this compound.  
INHALATION: remove victim from contaminated atmosphere; if breathing has ceased, start mouth-to-mouth resuscitation; oxygen should only be administered by an experienced person when authorized by a physician; keep patient warm and comfortable. EYES: immediately flush with large quantities of running water for a minimum of 15 min.; continue irrigation for an additional 15 min. if physician is not available. SKIN: immediately flush affected area with water; severe or extensive burns may be caused by silicon tetrachloride, producing shock symptoms (rapid pulse, sweating and collapse); keep patient comfortably warm. INGESTION: if patient is conscious give large amounts of lime water or milk of magnesia; plain water should be given if neither of these is available; do NOT give sodium bicarbonate or make any attempt to induce vomiting; if patient is unconscious, do not give anything but ensure there is no obstruction to breathing (tongue should be kept forward and false teeth removed); he will be less likely to aspirate vomitus if placed in a face-downward position.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Phenylethylene Styrol Styrolene Vinyl benzene	Watery liquid  Colorless to light yellow  Sweet pleasant odor  Floats on water. Flammable, irritating vapor is produced.
<b>Keep people away. Avoid contact with liquid and vapor. Wear chemical protective suit with self-contained breathing apparatus. Shut off ignition sources and call fire department. Notify local health and pollution control agencies. Protect water intakes.</b>	
<b>Fire</b>	FLAMMABLE CONTAINERS MAY EXPLODE IN FIRE. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear chemical protective suit with self-contained breathing apparatus. Combat fires from safe distance or protected location. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### Fire

Not flammable.

### Exposure

CALL FOR MEDICAL AID.  
DUST  
Irritating to eyes, nose and throat.  
If inhaled will cause coughing or difficult breathing.  
If in eyes, hold eyelids open and flush with plenty of water.  
If breathing has stopped, give artificial respiration.  
If breathing is difficult, give oxygen.

<b>Keep people away. Avoid contact with solid and dust. Wear self-contained positive pressure breathing apparatus and full protective clothing. Shut off ignition sources and call fire department. Notify local health and pollution control agencies. Protect water intakes.</b>	
<b>Fire</b>	COMBUSTIBLE. Produces vapors irritating to eyes and skin. Extinguish small fires: dry chemical, CO <sub>2</sub> , water spray or foam; large fires: water spray, fog or foam.
<b>Exposure</b>	CALL FOR MEDICAL AID.  SOLID Irritating to eyes and skin. Harmful if swallowed. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open if necessary. Wash skin with soap and water. Remove and isolate contaminated clothing and shoes at the site. If SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Aluminum triethyl ATE TEA	Liquid  Colorless  IGNITES WHEN EXPOSED TO AIR. Flammable gas is produced on contact with water.
Evacuate. Keep people away. Shut off ignition sources and call fire department. Wear rubber overclothing (including gloves). Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	IGNITES WHEN EXPOSED TO AIR. POISONOUS GASES MAY BE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry graphite, soda ash, or other inert powder. DO NOT USE WATER, FOAM, CARBON DIOXIDE, DRY CHEMICALS OR VAPORIZING LIQUIDS ON FIRE. DO NOT USE WATER ON ADJACENT FIRES.
<b>Exposure</b>	Call for medical aid.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

- 3.3 **Treatment of Exposure:** INHALATION: only fumes from fire need be considered; metal-fume fever is not critical, lasting less than 36 hrs. EYES: flush gently with copious quantities of water for 15 min. with lids held open; treat burns if fire occurred; get medical attention. SKIN: wash with water; treat burns caused by fire; get medical attention.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Anhydrous chloral Acetaldehyde, trichloro Chloral Ethanal, trichloro-	Oily liquid  Colorless  Pungent, irritating  Sinks and mixes. Combines with water to yield chloral hydrate.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear positive pressure breathing apparatus and chemical protective suit. Call fire department. Stay upwind and use water spray to knock down vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED IN FIRE OR WHEN HEATED. Containers may explode in fire. Wear positive pressure breathing apparatus and chemical protective suit. Fight fire from safe distance or protected location. Extinguish small fire: dry chemical, carbon dioxide, water spray or foam; large fires: water spray, fog or foam. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS. MAY BE FATAL IF INHALED. Irritating to eyes, skin and respiratory tract. Inhalation causes sore throat, shortness of breath, drowsiness, irritation of respiratory tract, unconsciousness. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS. MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH SKIN. May burn skin and eyes. IF IN EYES OR ON SKIN, immediately flush contaminated area with running water for at least 15 minutes; hold upper and lower eyelids open occasionally if appropriate. Speed in removing material from skin is extremely important. Remove and isolate contaminated clothing at the site. Effects may be delayed. Keep victim under observation. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	Effects of low concentration on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Hylyene T Mondur TDS Nacconate 100 TDI 2,4-Tolylene diisocyanate	Liquid  Colorless to light yellow  Sharp, sweet, fruity odor  Sinks and reacts with water. Freezing point is 68°F - 72°F.
Keep people away. AVOID CONTACT WITH LIQUID AND VAPOR. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Call fire department. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. POISONOUS GAS IS PRODUCED IN FIRE. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Extinguish with dry chemical or carbon dioxide. Water and foam may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  LIQUID POISONOUS IF SWALLOWED. Will burn skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

Ingestion of liquid or inhalation of mist causes nausea, vomiting, mental confusion, abdominal pain, sweating, giddiness, apprehension, and restlessness; later, muscular twitching of the eyelids and tongue begin, then other muscles of face and neck become involved; generalized twitching and muscle weakness may occur; pulmonary edema, ataxia, tremor, and convulsions may advance to coma.
- 3.3 **Treatment of Exposure:** Call physician for all exposures to this compound. **INHALATION:** support respiration; keep airway clear; use artificial respiration if breathing is difficult or has stopped. **EYES:** flush with water immediately after contact for at least 15 min. **SKIN:** remove victim's clothing and shoes immediately using rubber gloves; quickly wipe off affected area with clean cloths; immediately follow with a shower using plenty of soap; if complete shower is impossible, wash affected skin, hair, and fingernails repeatedly with soap and water using clean cloths each time to prevent spreading the contamination. **INGESTION:** induce vomiting repeatedly until vomit fluid is clear (save fluid for physician's examination); if vomiting cannot be induced within 5 min., have victim drink plenty of milk or water; have him lie down and keep him warm; if increased secretions make breathing difficult, prop patient up; if he stops breathing, apply artificial or mouth-to-mouth respiration, preferably through an airway; wash victim's mouth of contamination; mechanical resuscitator should be used if available; oxygen may be necessary; keep patient under observation for 24 hrs.

# TETRAETHYL LEAD

TEL

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Lead tetraethyl TEL	Oily liquid  Colorless, but generally dyed red  Fruity odor  Sinks in water. Poisonous, flammable vapor is produced.
Evacuate. Keep people away. <b>AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Combat fires from behind barrier or protected location. Flood discharge area with water. Extinguish with water, dry chemical, foam, or carbon dioxide. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

# TRIETHYLAMINE

TEN

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> TEN	Watery liquid      Colorless      Fishy odor  Floats on water. Flammable, irritating vapor is produced.
Keep people away. Avoid contact with liquid and vapor. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	<b>FLAMMABLE.</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Extinguish with dry chemical, alcohol foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> Irritating to eyes, nose and throat. If inhaled, will cause coughing, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	<b>HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS.</b> Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

Compound can be absorbed through skin. Ingestion of liquid or inhalation of mist causes nausea, vomiting, mental confusion, abdominal pain, sweating, giddiness, apprehension, and restlessness; later, muscular twitching of eyelids and tongue begin, then other muscles of face and neck become involved; pulmonary edema, ataxia, tremor, and convulsions may advance to coma. 3.3 <b>Treatment of Exposure:</b> Call physician for all exposures to this compound. INHALATION: support respiration; keep airway clear; use artificial respiration if breathing is difficult or has stopped. EYES: flush with water immediately after contact for at least 15 min. SKIN: remove victim's clothing and shoes immediately using rubber gloves; quickly wipe off affected area with clean cloths; immediately follow with a shower using plenty of soap; if complete shower is impossible, wash affected skin, hair, and fingernails repeatedly with soap and water using clean cloths each time to prevent spreading the contamination. INGESTION: induce vomiting by putting a finger down the throat or by giving warm salt water (one tablespoon salt per glass). Repeat until vomit fluid is clear (save fluid for physician's examination); if vomiting cannot be induced within five minutes, have victim drink plenty of milk or water; have him lie down and keep him warm; if there is difficulty in breathing due to increased secretions, chest may be cleared by propping patient up; if he stops breathing, use artificial or mouth-to-mouth respiration, preferably through an airway; wash victim's mouth of contamination; mechanical resuscitator should be used if available; oxygen may be necessary; keep patient under observation for 24 hrs.  3.4 TLV-TWA: 0.004 ppm (skin) 3.5 TLV-STEL: Not listed. 3.6 TLV-Ceiling: Not listed. 3.7 Toxicity by Ingestion: Grade 4; LD <sub>50</sub> <50 mg/kg 3.8 Toxicity by Inhalation: Currently not available. 3.9 Chronic Toxicity: Currently not available 3.10 Vapor (Gas) Irritant Characteristics: Currently not available 3.11 Liquid or Solid Characteristics: Currently not available 3.12 Odor Threshold: Currently not available 3.13 IDLH Value: 5 mg/m <sup>3</sup> (skin) 3.14 OSHA PEL-TWA: 0.05 mg/m <sup>3</sup> (skin) 3.15 OSHA PEL-STEL: Not listed. 3.16 OSHA PEL-Ceiling: Not listed. 3.17 EPA AEGL: Not listed

<b>Common Synonyms</b> Carbonic acid, thallium (1+) salt Dithallium carbonate Thallous carbonate		Solid (Crystals)      White
		Sinks and mixes with water.
<b>KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID AND DUST.</b> Wear self-contained positive pressure breathing apparatus and full protective clothing. Notify local health and pollution control agencies. Protect water intakes.		
<b>Fire</b>	Nonflammable. Poisonous and irritating fumes are produced in a fire or when heated. Wear self-contained positive pressure breathing apparatus and full protective clothing. Extinguish small adjacent fires: dry chemical, carbon dioxide, water spray, or foam; large fires: water spray, fog, or foam.	
<b>Exposure</b>	CALL FOR MEDICAL AID. POISONOUS. MAY BE FATAL IF INHALED, SWALLOWED OR ABSORBED THROUGH SKIN. ONSET OF SYMPTOMS MAY BE DELAYED 12 TO 24 HOURS. DUST Irritating to eyes and skin. If in eyes or on skin, flush with running water for at least 15 minutes; hold eyelids open periodically, if appropriate. Remove and isolate contaminated clothing and shoes at the site. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  SOLID If swallowed, may cause nausea, vomiting, diarrhea, abdominal pain and bleeding from the gut. IF IN EYES OR ON SKIN, flush with running water for at least 15 minutes; hold eyelids open periodically, if appropriate. Remove and isolate contaminated clothing and shoes at the site. IF SWALLOWED and victim is CONSCIOUS, have victim drink water and induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.	
<b>Water Pollution</b>	Harmful to aquatic life in very low concentrations. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

<b>3. HEALTH HAZARDS</b>  3.1 <b>Personal Protective Equipment:</b> Wear self-contained positive pressure breathing apparatus and full protective clothing. 3.2 <b>Symptoms Following Exposure:</b> Thallium is one of the more toxic elements, both as an acute and a chronic poison. Effects of exposure are cumulative and onset of symptoms may be delayed 12 to 24 hours. May be fatal if inhaled, ingested or absorbed through the skin. Readily absorbed through the skin and digestive tract. Digestion of soluble thallium compounds has caused many deaths. Ingestion of sublethal quantities may cause nausea, vomiting, diarrhea, abdominal pain, and bleeding from the gut accompanied or followed by drooping eyelids, crossed eyes, weakness, numbness, tingling of arms and legs, trembling, tightness and pain in the chest. Loss of hair may occur in two to three weeks. Severe intoxication may cause prostration, rapid heartbeat, convulsions, and psychosis. Some effects may be permanent. 3.3 <b>Treatment of Exposure:</b> INHALATION: Move victim to fresh air; call emergency medical care. If breathing has stopped, give artificial respiration. EYES OR SKIN: Immediately flush with running water for at least 15 minutes, lifting the upper and lower lids occasionally, if appropriate. Speed in removing material from skin is important. Remove and isolate contaminated clothing and shoes at the site. INGESTION: If conscious, have victim drink large quantities of water and induce vomiting by touching back of throat with a finger. If unconscious or having convulsions, do nothing except keep victim warm. 3.4 <b>TLV-TWA:</b> 0.1 mg/m <sup>3</sup> as thallium 3.5 <b>TLV-STEL:</b> Not listed. 3.6 <b>TLV-Ceiling:</b> Not listed. 3.7 <b>Toxicity by Ingestion:</b> Grade 4; LD <sub>50</sub> = 21 mg/kg (mouse) 3.8 <b>Toxicity by Inhalation:</b> Currently not available. 3.9 <b>Chronic Toxicity:</b> Thallous ion causes mutagenic effects (chromosomal aberrations) in animals and plants, and teratogenic effects (detremental to the sexual behavior, reproductive organs, egg and fetal development, and survival of the chicken). It also causes liver and kidney damage, hair loss and permanent effects such as staggering, visual difficulties, trembling and mental abnormalities. Chronic oral or cutaneous exposure of mice to thallium caused cancer of the female genital tract. 3.10 <b>Vapor (Gas) Irritant Characteristics:</b> Not pertinent 3.11 <b>Liquid or Solid Characteristics:</b> Currently not available 3.12 <b>Odor Threshold:</b> Currently not available 3.13 <b>IDLH Value:</b> 15 mg/m <sup>3</sup> (as thallium) 3.14 <b>OSHA PEL-TWA:</b> 0.1 mg/m <sup>3</sup> as thallium 3.15 <b>OSHA PEL-STEL:</b> Not listed. 3.16 <b>OSHA PEL-Ceiling:</b> Not listed. 3.17 <b>EPA AEGL:</b> Not listed

# TRIMETHYLHEXAMETHYLENE DIISOCYANATE

THI

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Hexane, 1,6-diisocyanato-2,2,4(2,4,4)-trimethyl-		Liquid	Colorless or yellowish
		Reacts with water to produce carbon dioxide and the diamine.	
<b>Keep people away. Avoid contact with liquid and vapor. Wear positive pressure breathing apparatus and special chemical protective suit. Shut off ignition sources and call fire department. Notify local health and pollution control agencies. Protect water intakes.</b>			
<b>Fire</b>	Combustible POISONOUS GASES ARE PRODUCED IN FIRE. Wear self-contained positive pressure breathing apparatus and special chemical protective suit. Extinguish small fires with dry chemical, CO <sub>2</sub> , water spray, or foam; large fires with water spray, fog, or foam. (It reacts with water to produce carbon dioxide and the corresponding diamine.)		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS. MAY BE FATAL IF INHALED OR ABSORBED THROUGH SKIN. Contact may cause burns to skin and eyes. Move to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS. MAY BE FATAL IF SWALLOWED OR ABSORBED THROUGH SKIN. Contact may burn skin and eyes. Immediately flush skin or eyes with running water for at least 15 minutes. Speed in removing from skin is of extreme importance. Remove and isolate contaminated clothing and shoes at the site. Keep victim quiet and maintain normal body temperature. Effects may be delayed; keep victim under observation. If swallowed and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b>  Bis(Dimethylthiocarbamyl)disulfide Methyl thiram Methyl tuads Tetramethyl thiuiram disulfide Thiuram	Solid White to light yellow  Sinks in water.
Call fire department. <b>KEEP PEOPLE AWAY. AVOID CONTACT WITH SOLID AND DUST.</b> Wear goggles and dust respirator. Stay upwind. Use water spray to "knock down" dust. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Flood discharge area with water.
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  SOLID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Wear self-contained positive pressure breathing apparatus and full protective clothing.
- 3.2 **Symptoms Following Exposure:** Thallium is one of the more toxic elements both as an acute and a chronic poison. Effects of exposure are cumulative and onset of symptoms may be delayed 12 to 24 hours. May be fatal if inhaled, ingested or absorbed through the skin. Irritating to skin and eyes. Readily absorbed through the skin and digestive tract. Ingestion of soluble thallium compounds has caused many deaths. Ingestion of sublethal quantities may cause nausea, vomiting, diarrhea, abdominal pain, and bleeding from the gut accompanied or followed by drooping eyelids, crossed eyes, weakness, numbness, tingling of arms and legs, trembling, tightness and pain in the chest. Loss of hair may occur in two to three weeks. Severe intoxication may cause prostration, rapid heartbeat, convulsions, and psychosis. Some effects may be permanent.
- 3.3 **Treatment of Exposure:** INHALATION: Move victim to fresh air; call emergency medical care. If breathing has stopped, give artificial respiration. EYES OR SKIN: Immediately flush with running water for at least 15 minutes, lifting the upper and lower lids occasionally, if appropriate. Speed in removing material from skin is important. Remove and isolate contaminated clothing and shoes at the site. INGESTION: If conscious, have victim drink large quantities of water and induce vomiting by touching the back of throat with a finger. If unconscious or having convulsions, do nothing except keep victim warm.

It also causes liver and kidney damage, hair loss and permanent effects such as staggering, visual difficulties, trembling, and mental abnormalities. Chronic oral or cutaneous exposure of mice to thallium caused cancer of the female genital tract.

0.03 ppm TI/atlantic salom/LD<sub>50</sub> 10 ppm TI/96 hr./brown shrimp/LC<sub>50</sub>
- 6.2 **Waterfowl Toxicity:** Approximate oral mean lethal dose in domestic mallards and wild white geese: 31 mg/kg (dry thallous acetate);  
16 mg/kg (in solution or coated on grain)
- 6.3 **Biological Oxygen Demand (BOD):** Currently not available
- 6.4 **Food Chain Concentration Potential:** Plants growing in soils or water with very high thallium content may accumulate sufficient thallium to be toxic to organisms that feed on them. Algae from contaminated water exhibited thallium bioconcentration factor of >430. Other bioconcentration factors that have been reported include 130 for atlantic salmon mussel and 18 for the edible portion of softshell clams. Thallium is a cumulative poison four times as toxic as arsenious oxide.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b>	Liquefied compressed gas Colorless Fish or ammonia odor  Floats and mixes and boils on water. Poisonous, flammable visible vapor cloud is produced.
<b>Evacuate.</b> Keep people away. Avoid contact with liquid and vapor. Wear goggles and self-contained breathing apparatus. Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	<b>FLAMMABLE.</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Stop flow of gas if possible. Cool exposed containers and protect men effecting shutoff with water. Let gas fires burn. Extinguish water solution fires with water spray, dry chemical, alcohol foam, or carbon dioxide.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> <b>POISONOUS IF INHALED.</b> Irritating to eyes, nose, and throat. Move to fresh air. IF IN EYES, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  <b>LIQUID</b> Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

# TRIMETHYLCHLOROSILANE

TMC

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Chlorotrimethylsilane Trimethylsilyl chloride	Liquid	Colorless	Sharp irritating odor
Reacts violently with water. Irritating gas is produced on contact with water.			
<b>Evacuate.</b> Keep people away. Avoid contact with liquid and vapor. Shut off ignition sources. Call fire department. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	FLAMMABLE. POISONOUS GASES MAY BE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Extinguish with dry chemicals or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE. Cool exposed containers with water.		
<b>Exposure</b>	Call for medical aid.  VAPOR Irritating to eyes, nose and throat. Harmful if inhaled. Move victim to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. DO NOT INDUCE VOMITING.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

# TETRAMETHYL LEAD

TML

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Lead tetramethyl	Oily liquid Colorless Fruity odor
Sinks in water. Poisonous, flammable vapor is produced.	
Evacuate. Keep people away. <b>AVOID CONTACT WITH LIQUID AND VAPOR.</b> Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Call fire department. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Combustible. Containers may explode in fire. Vapor may explode if ignited in an enclosed area. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Combat fires from behind barrier or protected location. Extinguish with water, dry chemicals, foam, or carbon dioxide. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED. Irritating to eyes. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Will burn eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Wear self-contained positive pressure breathing apparatus and full protective clothing.
- 3.2 **Symptoms Following Exposure:** Thallium is one of the more toxic elements both as an acute and a chronic poison. Effects of exposure are cumulative and onset of symptoms may be delayed 12 to 24 hours. May be fatal if inhaled, ingested or absorbed through the skin. Irritating to skin and eyes. Readily absorbed through the skin and digestive tract. Ingestion of soluble thallium compounds has caused many deaths. Ingestion of sublethal quantities may cause nausea, vomiting, diarrhea, abdominal pain, and bleeding from the gut accompanied or followed by drooping eyelids, crossed eyes, weakness, numbness, tingling of arms and legs, trembling, tightness and pain in the chest. Loss of hair may occur in two to three weeks. Severe intoxication may cause prostration, rapid heartbeat, convulsions, and psychosis. Some effects may be permanent.
- 3.3 **Treatment of Exposure:** INHALATION: Move victim to fresh air; call emergency medical care. If breathing has stopped, give artificial respiration. EYES OR SKIN: Immediately flush with running water for at least 15 minutes, lifting the upper and lower lids occasionally, if appropriate. Speed in removing material from skin is important. Remove and isolate contaminated clothing and shoes at the site. INGESTION: If conscious, have victim drink large quantities of water and induce vomiting by touching the back of the throat with a finger. If unconscious, or having convulsions, do nothing except keep victim warm.
- 3.4 TLV-TWA: 0.1 mg/m<sup>3</sup> (Tl) (skin)  
3.5 TLV-STEL: Not listed.  
3.6 TLV-Ceiling: Not listed.  
3.7 Toxicity by Ingestion: Grade 4; LD<sub>50</sub> = 15 mg/kg (mouse)  
3.8 Toxicity by Inhalation: Currently not available.  
3.9 **Chronic Toxicity:** Thallous ion causes mutagenic effects (chromosomal aberrations) in animals and plants, and teratogenic effects (detrimental to the sexual behavior, reproductive organs, egg and fetal development, and survival of the chicken). It also causes liver and kidney damage, hair loss and permanent effects such as staggering, visual difficulties, trembling, and mental abnormalities. Chronic oral or cutaneous exposure of mice to thallium caused cancer of the female genital tract.
- 3.10 **Vapor (Gas) Irritant Characteristics:** Currently not available  
3.11 **Liquid or Solid Characteristics:** Causes skin and eye irritation.

6.2 **Waterfowl Toxicity:** Approximate oral mean lethal dose in domestic mallards and wild white geese: 31 mg/kg (dry thallous nitrate).  
16 mg/kg (in solution or coated on grain)  
6.3 **Biological Oxygen Demand (BOD):** Currently not available  
6.4 **Food Chain Concentration Potential:** Plants growing in soils or water with very high thallium content may accumulate sufficient thallium to be toxic to organisms that feed on them. Algae from contaminated water exhibited thallium bioconcentration factor of > 430. Other bioconcentration factors that have been reported include 130 for atlantic salmon mussel and 18 for the edible portion of softshell clams. Thallium is a cumulative poison four times as toxic as arsenious oxide.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Methylbenzene Methylbenzol Toluol	Watery liquid  Colorless  Pleasant odor  Floats on water. Flammable, irritating vapor is produced.
<b>Keep people away.</b> <b>Shut off ignition sources and call fire department.</b> <b>Stay upwind and use water spray to "knock down" vapor.</b> <b>Avoid contact with liquid and vapor.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>	
<b>Fire</b>	<b>FLAMMABLE.</b> Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemical, foam, or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.
<b>Exposure</b>	<b>CALL FOR MEDICAL AID.</b>  <b>VAPOR</b> Irritating to eyes, nose and throat. If inhaled, will cause nausea, vomiting, headache, dizziness, difficult breathing, or loss of consciousness. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing difficult, give oxygen.  <b>LIQUID</b> Irritating to skin and eyes. If swallowed, will cause nausea, vomiting or loss of consciousness. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk. <b>DO NOT INDUCE VOMITING.</b>
<b>Water Pollution</b>	Dangerous to aquatic life in high concentrations. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Thiocarbonyl chloride	Liquid	Red	Sharp choking odor
Sinks in water. Reacts slowly with water and produces poisonous vapor.			
Evacuate. KEEP PEOPLE AWAY. AVOID CONTACT WITH LIQUID AND VAPOR. Wear goggles and self-contained breathing apparatus. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals or carbon dioxide. DO NOT USE WATER OR FOAM ON FIRE. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR POISONOUS IF INHALED. Irritating to eyes, nose and throat. Move victim to fresh air. If breathing has stopped, give artificial respiration (but not mouth-to-mouth). If breathing is difficult, give oxygen.  LIQUID POISONOUS IF SWALLOWED. Irritating to skin and eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.		
<b>Water Pollution</b>	Effect of low concentrations on aquatic life is unknown. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Methyl phosphite Phosphorous acid TMP Trimethyl ester	Liquid	Colorless	Pungent, pyridine-like odor
Avoid contact with liquid and vapors. Stay upwind; keep out of low areas. Wear self-contained positive pressure breathing apparatus and full protective clothing. Shut off ignition sources and call fire department. Use water spray to reduce vapors. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	COMBUSTIBLE. May be ignited by heat, sparks or flames. Vapors may travel to a source of ignition and flash back. Container may explode in heat of fire. Runoff to sewer may create fire or explosion hazard. Move container from fire area if you can do it without risk. Cool containers that are exposed to flames with water from the side. For massive fire in cargo area, use unmanned hose holder or monitor nozzles; if this is impossible, withdraw from area and let fire burn. Withdraw immediately in case of rising sound from venting safety device or any discoloration of tank due to fire.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR May be poisonous if inhaled. Vapors may cause dizziness or suffocation. Fire may produce irritating or poisonous gases. Move victim to fresh air. If not breathing, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Extremely destructive to upper respiratory tract, eyes, and skin. Harmful if absorbed through skin and eyes. Wash skin with soap and water. Remove and isolate contaminated clothing and shoes at the site. IF IN EYES: immediately flush eyes with running water for at least 15 minutes. IF SWALLOWED and victim is CONSCIOUS: have victim drink water or milk. DO NOT INDUCE VOMITING. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS: do nothing except keep victim warm.		
<b>Water Pollution</b>	Effects of low concentrations on aquatic life are not known. May be harmful if it enters water intakes. Notify local health and wildlife officials. Notify operators of local water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Octachlorocamphene	Waxy solid or in solution	Amber	Mild turpentine odor
Solid sinks in water, solution floats on water.			
Keep people away. Call fire department. Avoid contact with solid and solution. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	Solid not flammable, but usually dissolved in combustible liquid. POISONOUS GASES ARE PRODUCED IN FIRE. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Extinguish with foam, dry chemical or carbon dioxide. Water may be ineffective on fire. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  SOLID OR SOLUTION POISONOUS IF SWALLOWED. Irritating to skin and eyes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim quiet and warm.		
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Solution is fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

Symptoms include salivation, leg and back muscle spasms, nausea, vomiting, hyperexcitability, tremors, shivering, clonic convulsions, then tetanic contractions of all skeletal muscles. Lethal doses cause respiratory failure. Respiration, affected as a result of the exertion from vomiting or convulsions, is first arrested because of tetanic muscular contractions, then increased in both amplitude and rate as the muscles relax. 3.3 <b>Treatment of Exposure:</b> If symptoms of poisoning appear, promptly remove the unabsorbed pesticide from the stomach by inducing vomiting with warm salty or soapy water (if the patient is conscious) or from the skin with soap and water. Keep patient warm and quiet. Call a physician. 3.4 <b>TLV-TWA:</b> 0.5 mg/m <sup>3</sup> (skin) 3.5 <b>TLV-STEL:</b> 1 mg/m <sup>3</sup> (skin) 3.6 <b>TLV-Ceiling:</b> Not listed. 3.7 <b>Toxicity by Ingestion:</b> Grade 4; LD <sub>50</sub> below 50 mg/kg (dog) 3.8 <b>Toxicity by Inhalation:</b> Currently not available. 3.9 <b>Chronic Toxicity:</b> Currently not available 3.10 <b>Vapor (Gas) Irritant Characteristics:</b> The solid is non-volatile. ### 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Dust mask, gloves, goggles  
3.2 **Symptoms Following Exposure:** Excessive inhalation of dust may cause irritation of lungs and delayed symptoms similar to those observed after ingestion. Dust irritates eyes and skin and may be absorbed through skin on prolonged exposure. Ingestion causes irritation of mouth and stomach; inflammation of kidney and liver develops 1 to 4 days after exposure.  
3.3 **Treatment of Exposure:** INHALATION: remove victim to fresh air. EYES: flush with water for at least 15 min.; see physician if irritation persists. SKIN: wash thoroughly with soap and water. INGESTION: administer large doses of sodium bicarbonate. (This will convert the uranium salt to the bicarbonate, which is much less toxic.) Additional treatment is symptomatic; get medical attention.  
3.4 **TLV-TWA:** 0.2 mg/m<sup>3</sup> (as uranium)  
3.5 **TLV-STEL:** 0.6 mg/m<sup>3</sup> (as uranium)  
3.6 **TLV-Ceiling:** Not listed.  
3.7 **Toxicity by Ingestion:** Grade 3; LD<sub>50</sub> = 50 to 500 mg/kg  
3.8 **Toxicity by Inhalation:** Currently not available.

# VINYL ACETATE

VAM

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b>	Watery liquid	Colorless	Pleasant fruity odor
VAM Vinyl A monomer Vyac	Floats on water. Flammable, irritating vapor is produced.		
Evacuate. Keep people away. Shut off ignition sources and call fire department. Avoid contact with liquid and vapor. Stay upwind and use water spray to "knock down" vapor. Notify local health and pollution control agencies. Protect water intakes.			
<b>Fire</b>	FLAMMABLE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Combat fires from safe distance or protected location. Extinguish with dry chemical, foam, carbon dioxide. Cool exposed containers with water.		
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose and throat. If inhaled, will cause dizziness or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Irritating to skin and eyes. Harmful if swallowed or if spilled on skin. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.		
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. Fouling to shoreline. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> 1,1-Dichloroethylene unsym-Dichloroethylene	Watery liquid      Colorless      Sweet odor  Sinks in water. Flammable, irritating vapor is produced. Boiling point is 89°F.
Keep people away. Avoid contact with liquid and vapor. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Shut off ignition sources and call fire department. Stay upwind and use water spray to "knock down" vapor. Evacuate area in case of large discharge. Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	FLAMMABLE. POISONOUS GAS IS PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear self-contained breathing apparatus. Combat fires from safe distance or protected location. Extinguish with dry chemical, foam, or carbon dioxide. Cool exposed containers with water.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose, and throat. If inhaled, will cause dizziness or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will burn skin and eyes. Harmful if swallowed. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Chlorethylene VCL VCM Vinyl C monomer	Gas                      Colorless                      Sweet odor  Liquid floats and boils on water. Flammable, irritating visible vapor cloud is produced.
<p>Keep people away.  Evacuate.  Shut off ignition sources and call fire department.  Stay upwind and use water spray to "knock down" vapor.  Evacuate area in case of large discharge.  Avoid contact with liquid and vapor.  Notify local health and pollution control agencies.  Protect water intakes.</p>	
<b>Fire</b>	FLAMMABLE. POISONOUS GAS IS PRODUCED IN FIRE. Flashback along vapor trail may occur. May explode if ignited in an enclosed area. Wear self-contained breathing apparatus. Cool exposed containers and protect men effecting shutoff with water. Stop flow of gas if possible. Let fire burn. Extinguish small fires with dry chemical.
<b>Exposure</b>	CALL FOR MEDICAL AID.  VAPOR Irritating to eyes, nose, and throat. If inhaled, will cause dizziness or difficult breathing. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID Will cause frostbite. Flush affected areas with plenty of water. DO NOT RUB AFFECTED AREAS.
<b>Water Pollution</b>	Not harmful to aquatic life.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Fluoroethylene Monofluoroethylene	Gas                      Colorless                      Faint odor  Floats and boils on water. Flammable visible vapor cloud is produced.
Evacuate. Keep people away. Avoid contact with liquid. Shut off ignition sources. Call fire department. Stay upwind. Use water spray to "knock down" vapor. Notify local health and pollution control agencies.	
<b>Fire</b>	FLAMMABLE. POISONOUS GASES ARE PRODUCED IN FIRE. Containers may explode in fire. Flashback along vapor trail may occur. Vapor may explode if ignited in an enclosed area. Wear goggles and self-contained breathing apparatus. Let fire burn. Stop flow of gas if possible. Cool exposed containers and protect men effecting shutoff with water.
<b>Exposure</b>	Call for medical aid.  VAPOR If inhaled will cause headache, or dizziness. Move victim to fresh air. If breathing is difficult, give oxygen.  LIQUID Will cause frostbite. Flush affected areas with plenty of water. DO NOT RUB AFFECTED AREAS.
<b>Water Pollution</b>	Not harmful to aquatic life.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Cresylic acid Dimethylphenol 2-Hydroxy-m-xylene 2,6-Xylenol	Solid or liquid  Light yellowish brown  Sweet tarry odor  May float or sink in water.
<b>Keep people away.</b> <b>Avoid contact with solid and liquid.</b> <b>Call fire department.</b> <b>Notify local health and pollution control agencies.</b> <b>Protect water intakes.</b>	
<b>Fire</b>	Combustible. POISONOUS GASES ARE PRODUCED IN FIRE. Wear goggles and self-contained breathing apparatus. Extinguish with dry chemicals, foam or carbon dioxide. Water may be ineffective on fire.
<b>Exposure</b>	Call for medical aid. DUST Irritating to eyes, nose and throat. Harmful if inhaled. Move victim to fresh air. If in eyes, hold eyelids open and flush with plenty of water. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  LIQUID OR SOLID Irritating to skin and eyes. If swallowed or skin is exposed will cause nausea and vomiting. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.

## 3. HEALTH HAZARDS

- 3.1 **Personal Protective Equipment:** Organic canister mask; goggles or face shield; rubber gloves; other protective clothing to prevent contact with skin.
- 3.2 **Symptoms Following Exposure:** Vapor irritates eyes, nose, and throat and is readily absorbed through mucous membranes and lungs, producing general toxic symptoms (weakness, dizziness, headache, difficult breathing, twitching). Contact with skin causes temporary pricking and intense burning, then local anesthesia. Affected areas initially show white discoloration, wrinkling, and softening, then become red, then brown or black (signs of gangrene). Extensive burns may permit absorption of chemical to produce toxic symptoms described above. Ingestion causes irritation of mouth and stomach, nausea, abdominal pain, weakness, dizziness, headache, difficult breathing, and twitching.
- 3.3 **Treatment of Exposure:** Get medical attention at once following exposure to this compound.  
INHALATION: remove patient immediately to fresh air. Irritation of nose or throat may be somewhat relieved by spraying or gargling with water until all odor is gone; 100% oxygen inhalation is indicated for cyanosis or respiratory distress; keep patient warm, but not hot. EYES: flood with running water for 15 min.; if physician is not immediately available, continue irrigation for another 15 min.; 2-3 drops of 0.5% pontocaine or equivalent may be instilled after first 15 min.; do not use oils or oily ointments unless ordered by physician. SKIN: wash affected areas with large quantities of water or soapy water until all odor is gone; then wash with alcohol or 20% glycerin solution and more water; keep patient warm, but not hot; cover chemical burns continuously with compresses wet with saturated solution of sodium thiosulfate; apply no salves or ointments for 24 hrs after injury. INGESTION: give large quantities of liquid (salt water, weak sodium bicarbonate solution, milk, or gruel) followed by demulcent such as raw egg white or corn starch paste; if profuse vomiting does not follow immediately, give a mild emetic (such as 1 tbsp. mustard in glass of water), or tickle back of throat. Repeat procedure until vomitus is free of the odor. Some demulcent should be left in stomach after vomiting. Keep patient comfortably warm.

## CAUTIONARY RESPONSE INFORMATION

<b>Common Synonyms</b> Cyanide of zinc Zinc dicyanide	Solid-powder      Greyish white to white      Odorless  Sinks in water.
Keep people away. AVOID CONTACT WITH SOLID. Wear goggles, self-contained breathing apparatus, and rubber overclothing (including gloves). Notify local health and pollution control agencies. Protect water intakes.	
<b>Fire</b>	Not flammable.
<b>Exposure</b>	CALL FOR MEDICAL AID. DUST POISONOUS IF INHALED OR IF SKIN IS EXPOSED. Move to fresh air. If breathing has stopped, give artificial respiration. If breathing is difficult, give oxygen.  SOLID POISONOUS IF SWALLOWED OR IF SKIN IS EXPOSED. Irritating to eyes. Remove contaminated clothing and shoes. Flush affected areas with plenty of water. IF IN EYES, hold eyelids open and flush with plenty of water. IF SWALLOWED and victim is CONSCIOUS, have victim drink water or milk and have victim induce vomiting. IF SWALLOWED and victim is UNCONSCIOUS OR HAVING CONVULSIONS, do nothing except keep victim warm.
<b>Water Pollution</b>	HARMFUL TO AQUATIC LIFE IN VERY LOW CONCENTRATIONS. May be dangerous if it enters water intakes. Notify local health and wildlife officials. Notify operators of nearby water intakes.
